DETAILED ACTION

Allowable Subject Matter

Claims 1- 16 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to teach a video center which includes a communication module which is set up to receive requests for video data from communications terminals over a communication network and transmit requested video data to a respective communications terminal, the video center including a filter module which filters data, prior to their transmission, on the basis of current eye positions of the user of the communication terminal, which eye positions are transmitted from the respective communications terminal to the video center, such that outer picture regions, corresponding to video data, which are projected onto the retina outside the fovea, have lower resolution than inner picture regions, corresponding to the video data, which are projected on the fovea of the retina, and the filtered video data therefore contain a lesser quantity of data than the unfiltered video data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
